

**INKATERRA ACQUIRES ARTISANAL FISHING BOAT
FOR EDUCATION OF SUSTAINABLE TECHNIQUES**

The 'Analúa', an artisanal fishing boat from Paita (Northern Peru), was acquired by Inkaterra as an educational watercraft for the Cabo Blanco community. Sustainable fishing techniques will be practiced on board by a local crew, and its excursions will serve research purposes.

With this innovative approach, Inkaterra aims to encourage other fishermen to follow these practices. This will improve commercialization of fish, as well as conservation of marine resources in Cabo Blanco.
