BIRDWATCHING / AVISTAMIENTO DE AVES

On May 3, 10, 15, 21, from 6:30 a.m. to 17.00 p.m., behind blocks 70s and 80s and on the road to Rocotal observatory, a male and female Masked Fruiteaters (*Pipreola pulchra*) were sighted. Male has a black face including the superior part of the neck, and has a brilliant orange spot in the chest. Female is full of green and yellow feathers. They feed mostly from fruits and can also eat insects. Species known as:

Masked Fruiteater

Frutero Enmascarado

Pipreola pulchra

From May 1 to 31, between 6:00 a.m. and 16:00 p.m., two male and two female Andean Cocks of the Rocks (*Rupicola Peruviana*) were spotted at orchid trails I and II, entrance, lobby, dining room, blocks 20, 30, 40, 50, 60, 70, 80, 90, sacred rock, camping, tea house, Andean Bear Rescue Center, railway km 108-109, and the Andean Bear Semicaptivity Program. The male and female were seen perched and eating fruits: *Nectandra furcata* "Yanay Argoz", *Inga adenophylla* "Pacaemona", *Chamaedorea pinnatifrons* "Palmera tipo bambú", *Myrsine pseudocrenata* "Chalanque", *Heliconia* sp. "platanillo". It habitates in cloud forests, it belongs to the *Cotingidae* family, and is noticeable for its incredible plumage.

Andean Cock-of-the-rock

Gallito de las Rocas Andino, Tunki

Rupicola peruviana

From May 1 to 31, between 6:00 a.m. and 18:00 p.m., an Andean Motmot (*Momotus aequatorialis*) was spotted at orchid trails I and II, entrance, lobby, dining room, blocks 20, 30, 40, 50, 60, 70, 80, 90, sacred rock, camping, tea house, Andean Bear Rescue Center, railway km 108-109, and the Andean Bear Semicaptivity Program. It was found perched and eating fruits: *Nectandra furcata* "Yanay Argoz", *Inga adenophylla* "Pacaemona", *Chamaedorea pinnatifrons* "Palmera tipo bambú", *Myrsine pseudocrenata* "Chalanque", *Heliconia* sp. "platanillo". The Andean Motmot is known for its long and gradual tail, with central feathers with the shape of a racket that are moved as a pendulum.

Species known as:

Andean Motmot

Relojero Andino

Momotus aequatorialis

Con fecha 3, 10, 15, 21 de mayo, entre las 6:30 a.m.-17.00 p.m., detrás de los bloques, 70s, 80s y camino al observatorio Rocotal, se avisto a una pareja (macho y hembra) de fruteros enmascarados. Macho con cara negra, incluyendo la parte superior de la garganta, bordeado por debajo por un parche naranja brillante en el pecho. La hembra del frutero enmascarada es completamente listada de amarillo y verde. Se alimentan principalmente de frutos y pueden comer también insectos, conocida como:

Masked Fruiteater

Frutero Enmascarado

Pipreola pulchra

Con fecha 1 al 31 de mayo, entre 6:00 a.m. -16:00 p.m. se avisto al Gallito de las Rocas Andino (02 machos y 02 hembra), en el I, II sendero de las orquídeas, recepción, lobby, "comedor principal", bloques 20s, 30s, 40s, 50s, 60s, 70s, 80s, 90s, roca sagrada, camping, casa de té, casa de los osos andinos en cautiverio, a lo largo de la línea férrea km. 109 108, y en el Programa de Semicautiverio del Oso Andino, se observa 02 macho y 02 hembras, perchado y comiendo frutos de *Nectandra furcata* "Yanay Argoz", *Inga adenophylla* "Pacaemona", *Geonoma undata* *Chamaedorea pinnatifrons* "palmera tipo bambú", *Heliconia* sp. "platanillo", habita en los bosques de neblina, pertenece a la familia *Cotingidae*, y es notable por la increíble belleza de su plumaje conocida como:

Andean Cock-of-the-rock

Gallito de las Rocas Andino, Tunki

Rupicola peruvianus

Con fecha 1 al 31 de mayo, entre 6:00 a.m. -18:00 p.m. se avisto al Relojero Andino En el I, II sendero de las orquídeas, recepción, lobby, "comedor principal", bloques 20s, 30s, 40s, 50s, 60s, 70s, 80s, 90s, roca sagrada, camping, casa de té, casa de los osos andinos en cautiverio, línea férrea del km. 108, programa de semi-cautiverio del oso andino, perchado y comiendo frutos de *Nectandra furcata* "Yanay Argoz", *Inga adenophylla* "Pacaemona", *Chamaedorea pinnatifrons* "palmera tipo bambú", *Myrsine pseudocrenata* "Chalanque", *Heliconia* sp. "platanillo", pertenece a la familia *Momotidae*, se caracteriza por su cola de larga con las rectrices graduales, las centrales terminadas en forma de raqueta, que menea con movimiento pendular, especie conocida como:

Andean Motmot

Relojero Andino

Momotus aequatorialis

Chestnut-breasted Coronet
 Picaflor Pechicastaño
Boissonneaua matthewsii

From May 1 to 31, the following bird species were spotted at orchid trails I and II, entrance, lobby, dining room, blocks 20, 30, 40, 50, 60, 70, 80, 90, sacred rock, camping, lobby, tea house, Andean Bear Rescue Center, railway km 108, and Andean Bear Semicaptivity Program. From 6:30-9am and 15:00-17:00pm, are the best hours to observe birds at cloud forests where the following trees outstand: *Erythrina falcata* "pisonay", *Nectandra furcata* "yanay argoz", *Inga adenophylla* "Pacaemono", *Juglans neotropica* "nogal", *Myrsine pseudocrenata* "chalanque", *Piper elongatum* "matico", *Weinmannia pentaphylla* "Huichullu" arbustos como *Chamaedorea pinnatifrons* "palmera tipo bambú", *Geonoma undata*, *Fuchsia boliviana*.

Con fecha 1 al 31 de Mayo se avisto las siguientes especies de aves, entre la I, II sendero de las orquídeas, recepción, lobby, "comedor principal", bloques 20s, 30s, 40s, 50s, 60s, 70s, 80s, 90s, roca sagrada, camping, casa de té, casa de los osos andinos en cautiverio, línea férrea del km. 108, programa de Semicautiverio del oso andino del centro de rescate, siendo entre las 6:30-9:00 a.m. y 15:00-17:00 p.m., las mejores horas para avistar aves dentro del bosque de neblina donde predomina arboles de: *Erythrina falcata* "pisonay", *Nectandra furcata* "yanay argoz", *Inga adenophylla* "Pacaemono", *Juglans neotropica* "nogal", *Myrsine pseudocrenata* "chalanque", *Piper elongatum* "matico", *Weinmannia pentaphylla* "Huichullu" arbustos como *Chamaedorea pinnatifrons* "palmera tipo bambú", *Geonoma undata*, *Fuchsia boliviana*
